**COUNTYTRAK  
PERFORMANCE  
INDEX 2024**

## Introduction

Kenyans overwhelmingly ushered in our current constitution on the promise of devolution which they felt result in increased grass root access to resources and political power. Indeed, people's expectations of county governments continue to be extremely high.

While most county governments tend appreciate this fact and try to capitalise on low hanging fruits as soon as they kick off, others prefer to spend the nascent stages laying the ground work and planning elaborately for delivery. Irrespective of leadership styles may differ, what is critical is for people to feel the impact of devolution in their daily lives. County governments need to fully decipher the perceptions of their residents and develop strategies that are concomitant with their expectations.

It's against this back drop that Infotrak Research developed the CountyTrak™ Performance index to provide Citizens' Indexcard of their County governments against set key performance indicators.

## The CountyTrak Methodology

**“This Index is the first of its kind and magnitude in Kenya. It provides the county governments and other interested stakeholders with robust statistics by ward on the perception of county residents over county governments’ performance of the devolved functions.”**

- Our current index was conducted between October – December 2024 covering all the 47 counties, 290 constituencies and 1450 wards with an overall sample of 36,200. Each county was treated as an individual universe and assigned a cluster sample which ranged between 600 and 2000 respondents guided by the population and number of wards in the respective counties. Within each county, sampling frames were designed using population proportionate to size guided by census data and catered for demographics such as age, gender etc. Data was collected through Computer Assisted Telephone Interviews (CATI) and analysed using SPSS.
- The CountyTrak tool consisted of twelve core functions with thirty three key performance indicators and five approval rating questions. The functions included: Agriculture, Health, Education, Roads & Transport, Energy, Water management, Environment & natural resources management, Trade & Tourism, County Planning & Development, Housing, Lands & settlement, Culture & Sports and Social Services. Also covered was Public Participation, Planning, and Management of County Resources.
- The final questionnaire was structured with using 1-10 Likert scale being applied on each indicator where 1 was very poor and 10 was excellent. The mean was computed for each Sub-Indicator of the Key Performance Indicators (KPI) to get the Index for that Specific KPI. The Overall County performance Index was then computed by taking the average of the KPIs.

# SAMPLE (n) FOR EACH COUNTY

County	CountyTrak Sample per County (n)	Margin of Error @ 95% degree of confidence (±)
Nairobi City	2000	2.2%
Kiambu	1500	2.5%

# The County Functions covered

Under the other key functions, we included the following:

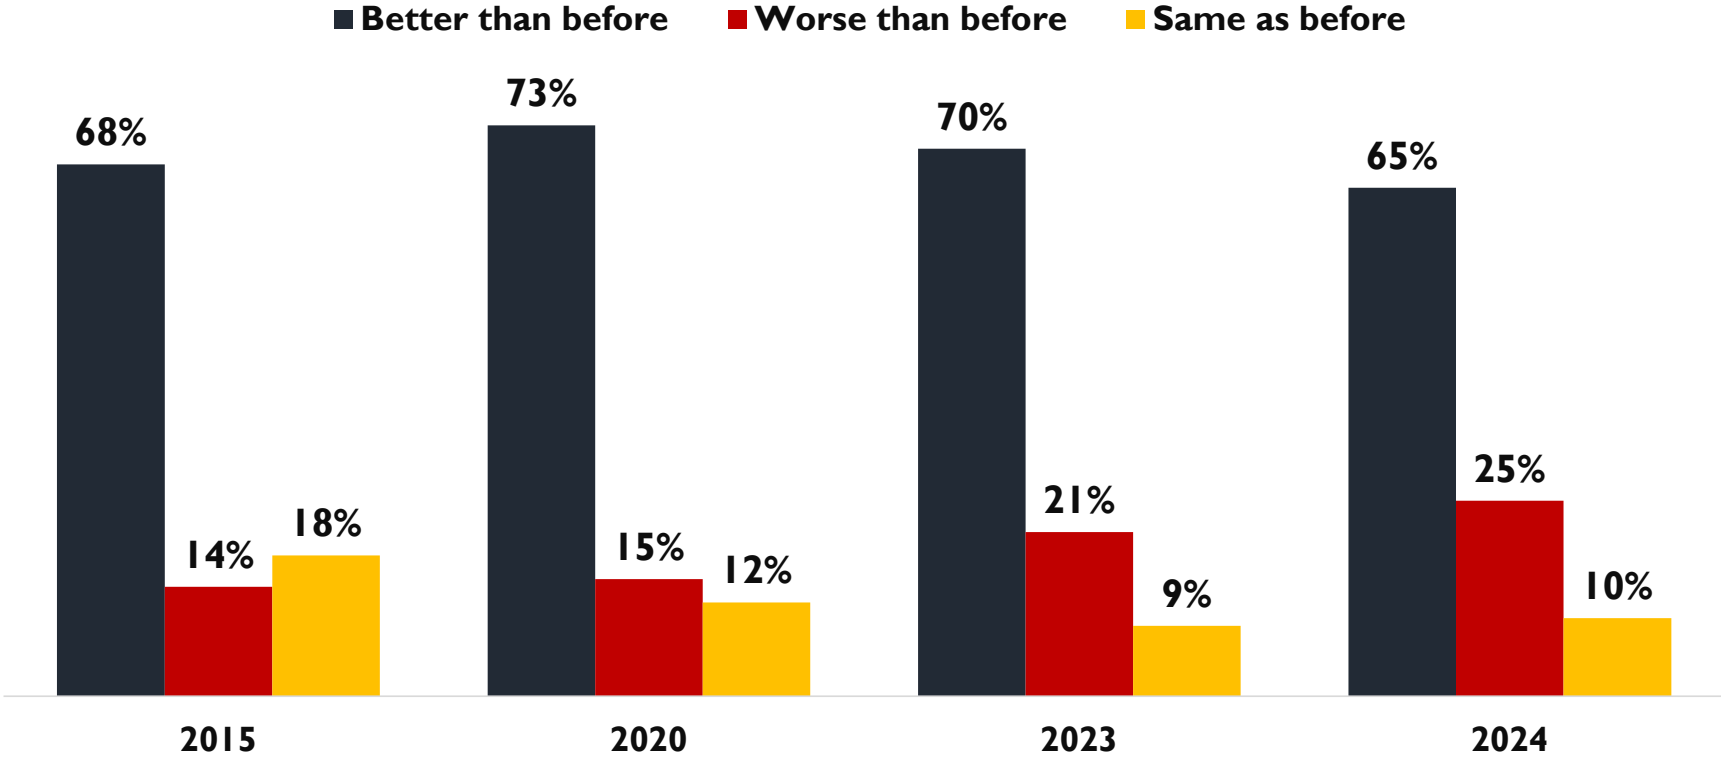

- Making it difficult for people to access hard drugs (bhang, khat, illicit brews, etc.) and pornography? (i.e. licensing, enforcement, registration etc..)
- Ensuring county government services are available in your ward
- Preventing corruption (i.e. zero tolerance to corruption and taking action on alleged corruption cases)

# STATUS OF THE COUNTIES

# STATUS OF THE COUNTY

*Focusing on development how would you compare your county of residence now and before the introduction of devolution in 2013?*

## STATUS OF THE COUNTY\_2024

	MEAN Index	43%

Using a scale of 1 – 10, where 1 is extremely poor and 10 is excellent, how would you rate your county government's performance with regard to the following devolved functions:

Under the Agriculture function, how would you rate your county government's performance in

- Making it easy for farmers to grow and sell their crops, livestock or fish
- Making food more accessible and affordable to you and your family
- Ensuring there is proper management of livestock diseases e.g. foot and mouth, anthrax, Newcastle disease, rabies etc and disposal of dead animals
